SEI Contracts with ICS Laboratories

McLean, VA November 15, 2013. With unanimous approval from the SEI Board of Directors, SEI is pleased to announce that it has entered into an agreement with ICS Laboratories, Inc. to conduct eye and face protection certification program testing. This includes testing to both the ANSI/ISEA Z87.1-2010 (with the exception of Sections 9.17 & 9.18) and the CAN/CSA Z94.3-07 (R2012) standards. SEI is confident that the signing of the agreement will initiate a long term relationship, benefiting both SEI participants as well as consumers.

ICS Laboratories, located in Brunswick, Ohio, has a long history of providing test services and conformity assessment evaluations for various types of Personal Protective Equipment (PPE). Additionally, ICS Laboratories is accredited as an ISO/IEC 17025 laboratory by the American Association for Laboratory Accreditation (A2LA) with a broad scope covering (amongst other products) eye and face protection standards.

The addition of ICS Laboratories will allow an additional laboratory option for both initial and annual industrial eye & face protection submittals.

Information about SEI's certification programs and the most current version of the SEI **Certified Product List** can be accessed on SEI's web site, www.SEInet.org. The SEI home page includes the SEI **Certified Product List** which provides certified product model names and numbers, manufacturer's names, and contact information.
